The Stratos Combi Soliq is a highly versatile combination machine for winter maintenance under all weather conditions. It is extremely adaptable and offers a combination of different methods and spreading materials from one all-round machine. As such it is able to respond to a whole host of different weather conditions with the ideal solution to match the circumstances. These range from the spreading of abrasive materials, dry salt and wet salt with various brine percentages to brine spraying. Complete versatility in one all-rounder.
