Attachments for the Schmidt Flexigo 150

aebe-schmidt.com

One machine. Numerous possibilities.

The Schmidt Flexigo 150 is flexibly expandable and can be combined with countless attachments and equipment, making it a workhorse for either summer or winter maintenance.

Increase productivity all year round with snow plows, spreaders, and blowers in winter, and as a sweeper with mowers, brushes, and wet scrubbers in summer. Whether you're maintaining walkways, fields, or parking lots, the Flexigo can go anywhere, anytime.

Compact, Multi-functional, All-season

The smallest all-rounder in the Schmidt sweeper family is flexibly expandable and can be combined with many attachments and mountable equipment for both summer and winter road maintenance. With its comfortable articulated steering, high payload and a permissible gross vehicle weight of 3.85 tons, the Flexigo 150 can be used over a wide area. Pass through narrow entrances to work in tight spaces and low overhead areas all year, in all seasons. Sweep, clean, clear snow & ice, and perform grounds maintenance work with a large family of attachments.

In addition to its use as a sweeper, other attachments and mounted implements, such as a scrub deck, mower/collection combination, snow plow or attachable and mounted spreader, allow it to be used all year round. The integrated quick-change system makes conversion simple, safe and fast.

- A further increase in productivity, through year-round utilization of the vehicle
- Lower maintenance costs, thanks to a smaller vehicle fleet
- Wide range of possible applications

Technical data

	Flexigo 150 Basic Unit
Dimensions	
Length	163.5"
Width	53"
Height / Height with Beacon	78" / 89"
Wheelbase	80.5"
Steering	
Turning circle - inner diameter	144"
Weights	
Empty weight of basic unit (approx.)	4,630 lbs
Payload	3,086 lbs
Permitted total weight	7,716 lbs
Tires	
Standard front tire size	195/75 R16 / 255/65 R16 / 320/55 R16
Standard rear tire size	195/75 R16 / 255/65 R16 / 320/55 R16
Drive System	
Engine type	Perkins Diesel 404FE22TA
Fuel	Diesel

Streets & Pavement

Take on the streets with sweeping and wet cleaning attachments to keep your community's pavement spaces clean.

Scrubbing Wet Vac

Pairing a scrub deck and debris hopper turns the Flexigo into a mechanical surface wet cleaner with simultaneous dirty water extraction. It's 3 free-oscillating brushes and edge-cleaning design make it a breeze to handle parking structures and pavement.

Add your choice of cleaning agents to onboard tanks and use the metering system to regulate the ratio of cleaning solution to water based on the application.

Flooding

Wet cleaning can be a useful alternative to sweeping under hot, dry, and dusty conditions. Equipped with a 60" wash bar, roads and pavement can be cleaned with low, medium, or high pressure.

2-brush (standard)

2-Brush or 3-Brush Sweeping

The Flexigo 150 is available with a professional 2-brush or optional 3-brush system. A good overlap between the brushes and the suction nozzle ensures that no material is left lying around even when driving around tight bends.

The brush system is operated via a joystick integrated into the armrest, ensuring fatigue-free working. A hydraulic support pressure control for the front linkage is available as an option. This ensures optimum ground adjustment and reduces wear on the front brushes to a minimum.

3-brush (optional)

Streets &
Pavement

Watering

Trees, plants, and flower beds can be watered easily and efficiently with one watering arm. With a large swivel range and operation directly from the vehicle, watering will no longer be a hassle.

- 250° (125° left or right) swivel radius
- 12.5' reach
- 13.5' working height (approx.)

Rotary Broom

Equip your machine to handle miles of pavement, heavy debris loads, and demanding environments by cleaning wider areas at once with various brush width options.

- 51" - 59" brush width options
- 26° angle adjustability left or right to direct material where you want it

Keep your communities **clean**

Investing in high-quality street-cleaning attachments is one of the most effective ways to keep communities cleaner and safer. Remove dirt, litter, and harmful pollutants before they spread, creating cleaner, more welcoming streets for both residents and visitors. By preventing clogged storm drains and reducing wear on pavement, they also help extend the life of community infrastructure—saving time, labor, and long-term maintenance costs.

Whether you're maintaining busy downtown corridors, industrial sites, or residential neighborhoods, our street-cleaning attachments deliver the efficiency, reliability, and professional results that keep communities vibrant and operating at their best.

Snow & Ice

Snow plows, blowers, spreaders, and brine systems can turn your Flexigo into a powerhouse against snow and ice. The low center of gravity combined with the compact dimensions ensure safe working and maneuvering, even under the most difficult weather conditions.

Straight Blade Plow

Control snow and ice your way with a heavy-duty straight blade plow.

- 55" - 61" wide
- 35° angle adjustment left or right

V-Plows

Control snow and ice your way with an adjustable V-plow. Push through snow or scoop it depending on your configuration.

Plow in using various plow configurations to get different clearing widths.

- V-shape: 55"
- Wedge shape: 52"
- Straight blade: 54" when angled left or right at 31°

Spreaders

Chassis-mounted or rear-mounted spreaders, plus sprayers, make fighting ice easier than ever. For added versatility, mount a spreader into an optional rear hydraulic tipper with 1 cu-yd capacity and dual acting cylinders for dumping/hauling without the spreader.

- .75 cu-yard capacity spreaders: mount directly on rear frame to apply material on demand
- 185 gal. capacity brine sprayers: mount to rear frame and adjust to treat areas 55" - 134" wide

Snow Blowers

Move snow quickly and efficiently with a snow blower attachment.

Snow can be directionally discharged with the hydraulic rotating chute controlled by the operator from the heated cab when using the SBL HY 14-40 attachment.

- Clear snow at 55" wide and up to 26" deep
- 15.75" auger depth

Front Brooms

Sweep snow out of the way, reaching uneven sections or into cracks a plow or blower won't access. Add the Flexigo 150 spreader or sprayer options to efficiently clear and treat sidewalks in a single pass with just one machine.

- 51" to 59" wide broom options
- 26° angle left or right to direct material where you want it

Brine System

Stop the ice before it happens with preventative de-icing using a brine system. Save on salt costs and make sure the salt stays where you put it.

Add an optional plow or broom on the front to clear snow and prevent ice hazards with one machine that optimizes efficiency.

Trust in our many years of uniquely diverse experience. **Get in touch with us.** We'll find the right solution for your specific challenge.

Grounds Maintenance

Mowers, trimmers, front rotary brooms, and watering accessories for your Flexigo make keeping gardens, park lawns, and even large fields a breeze.

Front Brooms

Brush leaves, grass clippings, and other debris from paved walking paths, sidewalks, bike lanes, and roadsides.

- 51" to 59" wide broom options
- 26° angle left or right to direct material where you want it

Flail Mower

Cut field grasses and small diameter (<1") material with a working width of 55".

Utility Bed

Use the tailor-made tiltable bed for transport at any time of year. Steel construction with aluminum sides that can be pulled out and up, plus a rear fold-down tailgate mean easy loading and unloading for any material.

- 61" long x 41" wide x 16" deep
- 1 cu-yard bed capacity
- 1,980 lbs payload

Mowers - Turf

Effectively mow turf from the comfort of a heated and airconditioned cab with a powerful three-blade rotary mower that cuts 62" wide at adjustable heights of 1.1-3.8".

Configure the standard rear discharge deck with options that provide high-volume side discharge, finer mulched material discharged in the path of the mower, or hopper collection that vacuums the standard rear discharged material to the rear 2 cu-yd hopper for disposal or composting elsewhere.

Add in accessories for added efficiency in your workflow:

- Mower Decks
- Rear Suction Adapters
- Mulching Inserts
- Side Ejection Inserts

Boom Mower & Trimmer

Mow or trim trail edges and path sides with the boom mower or hedge trimmer. Tackle jobs up high and on the ground! Pair with a water tank or brine system for the ultimate all-in-one maintenance machine.

- Quick change system for fast and easy tool changes
- Right and left side work
- Power arm width up to 118"

Scrubbing, Flooding & Watering

Care for the paths alongside grass, flowers, and fields with wet cleaning attachments.
