

Aebi Schmidt Holding AG

Conflict Minerals Report For the Year Ended December 31, 2025

This report for the calendar year ended December 31, 2025, is presented pursuant to Rule 13p-1 under the Securities Exchange Act of 1934 (the "Rule"). The Rule was adopted by the Securities and Exchange Commission ("SEC") to implement reporting and disclosure requirements related to conflict minerals as directed by the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 ("Dodd-Frank Act"). The Rule imposes certain reporting obligations on SEC registrants whose manufactured products contain tantalum, tin, tungsten, or gold, which are necessary to the functionality or production of their products. The term "Conflict Minerals" is defined as columbite-tantalite (coltan), cassiterite, gold, wolframite, tantalum, tin, tungsten, and any other mineral or its derivatives determined by the U.S. Secretary of State to be financing conflict in the Democratic Republic of the Congo (DRC) or an adjoining country. The term "3TG" is defined as tantalum, tin, tungsten, and gold and their compounds.

If a registrant can establish that the 3TG in their supply chain originated from sources other than the Democratic Republic of the Congo or an adjoining country, as defined by the SEC (the "Covered Countries"), or from recycled and scrap sources, they must submit a Form SD which describes the Reasonable Country of Origin Inquiry ("RCOI") that the registrant completed.

If a registrant has reason to believe that any of the 3TG in their supply chain may have originated in the Covered Countries, or if they are unable to determine the country of origin of those conflict minerals, then the issuer must exercise due diligence on the conflict minerals' source and chain of custody. The registrant must annually submit a Conflict Minerals Report ("CMR") to the SEC that includes a description of those due diligence measures.

Company Overview

Aebi Schmidt Holding AG ("Aebi Schmidt," "we," "us" or "are") is a leading global manufacturer of specialty vehicles. We are headquartered in Switzerland and employ approximately 6,000 people. We operate in 17 countries through our own sales and service organizations, with more than 70 locations worldwide, including over a dozen production facilities and a dense network of upfitting and service centers. Through established partnerships with dealers, we are represented in more than 90 additional countries globally. Our core offerings include solutions and equipment for snow removal and de-icing, street and runway sweepers, truck and recreational vehicle ("RV") chassis, as well as truck bodies and vehicle upfitting for a wide range of commercial fleets and vocations. Furthermore, we produce specialty vehicles and equipment for municipal and airport maintenance services as well as for the cultivation of steep and challenging terrain.

Acquisition of The Shyft Group, Inc.

On July 1, 2025, Aebi Schmidt completed the acquisition of The Shyft Group, Inc. ("Shyft"), a niche market leader in specialty vehicle manufacturing and assembly for the commercial and recreational vehicle industries (the "Acquisition"). The Acquisition was completed pursuant to the terms of an Agreement and Plan of Merger, dated as of December 16, 2024, by and among Shyft, Aebi Schmidt, ASH U.S. Group, LLC, a Delaware limited liability company and direct, wholly owned subsidiary of Aebi Schmidt ("Holdco"), and Badger Merger Sub, Inc., a Michigan corporation and direct, wholly owned subsidiary of Holdco. Shyft is now an indirect, wholly owned subsidiary of Aebi Schmidt. The Acquisition was primarily intended to enhance our product offerings in specialty vehicle solutions, to develop our market share in North America and to leverage Shyft's innovative design and manufacturing capabilities. Upon completion of the Acquisition, Aebi Schmidt common stock immediately became available for trading on Nasdaq.

Conflict Minerals Policy

Effective upon completion of the Acquisition, we issued a Conflict Minerals Policy and largely adopted Shyft's procedures relating to Conflict Minerals. Aebi Schmidt and its subsidiaries endeavor to maintain the highest standards of ethical conduct and integrity in all areas of their business activities.

We are committed to working closely with our supply chain to ensure we fully comply with the requirements set forth in Section 1502 of the Dodd-Frank Act. We have implemented the Organization for Economic Co-operation and Development ("OECD") Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas and are utilizing the conflict minerals reporting template ("CMRT") owned by the Responsible Minerals Initiative ("RMI"), for exercising due diligence within our supply chain.

We do not knowingly source any product containing Conflict Minerals and we continue to work on our due diligence process to verify that the components we source do not contain Conflict Minerals. We have requested that our suppliers commit to responsible sourcing of 3TG used in the production of components supplied to us. We expect our suppliers to have in place policies and due diligence measures that will enable us to reasonably assure that products and components supplied to us containing 3TG are DRC conflict free. Our suppliers are requested to perform due diligence to determine the source of any 3TG that are contained in the components that they supply to us. Our suppliers' due diligence is expected to include, where applicable, completion of the RMI Conflict Minerals reporting CMRT.

Our Conflict Minerals policy is posted on our website at www.aebi-schmidt.com/corporategovernance.

RCOI & Due Diligence

Our due diligence measures have been designed to conform with the OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas and the related Supplements for Gold and for Tin, Tantalum and Tungsten ("OECD Guidance").

Supply Chain

We rely on our direct suppliers to provide information on the origin of 3TG contained in components and materials supplied to us, including sources of 3TG that are supplied to them from lower tier suppliers. We have requested that our suppliers commit to the responsible sourcing of Conflict Minerals used in the production of components supplied to us. Our suppliers have been requested to perform due diligence to determine the source of any Conflict Minerals that are contained in the components that they supply to us. Our suppliers' due diligence is expected to include, where applicable, completion of the CMRT. The CMRT was developed to facilitate disclosure and communication of information regarding smelters that provide material to a company's supply chain. It includes questions regarding a company's conflict-free policy, engagement with its direct suppliers, and a listing of the smelters the company and its suppliers use. In addition, the CMRT contains questions about the origin of Conflict Minerals included in their products, as well as supplier due diligence. Written instructions and recorded training illustrating the use of the tool are available on RMI's website.

For the 2025 reporting year, all of our relevant suppliers were asked to complete the CMRT.

Due Diligence Process

We reviewed the components that are included in the products that we manufacture and supply that could contain 3TG that is necessary to the functionality or production of our products. Our due diligence measures have been designed to conform with the framework in the OECD Guidance.

Step One: Establish Strong Company Management Systems

Internal Team

At our corporate level, we have a cross-functional team, supplemented by a third-party consulting subject matter expert, to administer our program. This team is responsible for the management of our Conflict Minerals policy and providing support and instructions regarding due diligence measures to be followed for each of our segments.

Supplier Engagement

We have a robust supplier management plan for new and existing suppliers for Conflict Minerals. Existing suppliers are requested to comply with Aebi Schmidt's Global Supplier Standards and Aebi Schmidt's Terms and Conditions, both of which include Conflict Minerals reporting requirements. Our internal supplier management processes also ensure supplier compliance with Conflict Minerals reporting requirements with key suppliers who are party to long-term agreements.

Grievance Mechanism

We maintain an ethics hotline, accessible at www.aebi-schmidt.ethicspoint.com, through which a party, including Aebi Schmidt employees and suppliers, may submit reports or concerns regarding compliance, including with respect to Conflict Minerals.

Step Two: Identify and Assess Risk in the Supply Chain

All of our relevant suppliers were identified for inclusion in our 2025 RCOI. We rely on these suppliers, whose components we believe may contain 3TG, to provide us with information about the source of Conflict Minerals, if any, contained in the components supplied to us. Our direct suppliers are similarly reliant upon information provided by their suppliers.

We assess risk by reviewing our suppliers' responses provided in their respective CMRTs for risk indicators. Risk indicators identified from the CMRT reports are communicated back to our suppliers for awareness and continuous improvement in future Conflict Minerals reporting requirements.

Step Three: Design and Implement a Strategy to Respond to Risks

Relevant suppliers are requested to provide a CMRT for each reporting year. Supplier CMRTs are evaluated against a set list of data quality standards. Any discrepancies identified are sent back to the supplier for further investigation and corrective action.

Step Four: Carry Out Independent Third-Party Audit of Supply Chain Due Diligence at Identified Points in the Supply Chain

We do not typically have a direct relationship with 3TG smelters and refiners and do not perform or direct audits of these entities within our supply chain. We do track all smelters that have been audited via the RMI.

Step Five: Report on Supply Chain Due Diligence

We used the CMRT to conduct a survey of those suppliers described above. The CMRT is designed to facilitate disclosure and communication of information regarding smelters that provide material to a company's supply chain. It includes questions regarding a company's conflict-free policy, engagement with its direct suppliers, and a listing of the smelters the company and its suppliers use. In addition, the CMRT contains questions about the origin of 3TG included in their products, as well as supplier due diligence. Written instructions and recorded

training illustrating the use of the tool is available on RMI's website. The CMRT is being used by many companies in their due diligence processes related to Conflict Minerals.

For the 2025 reporting year, the data collected included the names of 578 entities listed by our suppliers as smelters or refiners. 241 of these entities were identified as validated to be Conflict-Free by the RMI. We compared these facilities to the RMI list of smelters and confirmed that the facilities identified as Conflict-Free were listed by RMI.

A majority of the responses received provided data at a company level or were unable to specify the smelters or refiners used. We are unable to determine whether any of the 3TG reported by our suppliers was contained in components or parts supplied to us or to validate that any of these smelters or refiners are actually in our supply chain. Requesting that our suppliers complete the CMRT regarding information about 3TG smelters and refiners in our supply chain represents the most reasonable effort we can make to determine the mines or locations of origin of the 3TG in our supply chain.

We remain committed to this process and will continue to refine and enhance our Conflict Minerals due diligence program. Based on the information obtained through our RCOI and the due diligence process, we do not have sufficient information to ascertain the country of origin of the 3TG used in our products.

Below is the list of smelters and refiners that were provided by our supply chain. Since reporting was completed at a company level, we cannot determine with certainty that these smelters are part of our supply chain.

Our efforts to pinpoint the mine or location of origin of the 3TG used in our products involved the due diligence measures detailed in this report. Specifically, as independent third-party audit programs verify the existence of sufficient evidence concerning the country, mine, and/or location of origin of the 3TG processed by the audited smelter or refiner facilities, we relied on the information provided by these programs for the smelters and refiners in our supply chain. Despite these measures, we could not definitively determine the country of origin and/or chain of custody of all necessary 3TG processed by these facilities for this reporting period.
